Wireless 0-5V ADC Sampling Interface

General Description

The device is designed for a variety of resistive bridge-sensing applications like pressure, temperature, and level-sensing applications. It can also support other applications, weight scale and force-sensing applications that use strain gauge load cells, and other general resistive bridge signal-conditioning applications.

Principle of Operation

This device can be connected to an ADC sampling interface device. Bare line black is the ground line; red one is the ADC sampling interface line, and the ADC sampling voltage range is 0-5V, which uses the SX1276 wireless communication module.

Example Applications

- Battery Health
- Voltage Measurement
- Transducer Measurement
