# Traffic Light Module PINOUT

For use with breadboards or microcontrollers. This PCB has 4 pins. Accepts 3VDC to 9VDC input. General pin input output (GPIO) should be programmed to digital output for LEDs and 0V (Ground) for pin 1.

Pin 1 = Ground
Pin 2 = Green
Pin 3 = Yellow
Pin 4 = Red

---

**Use Case**

Toy car & trucks, electronics, and hobby projects.
