

# Digital Soldering Iron Controller

for soldering iron HAKKO 907 ESD

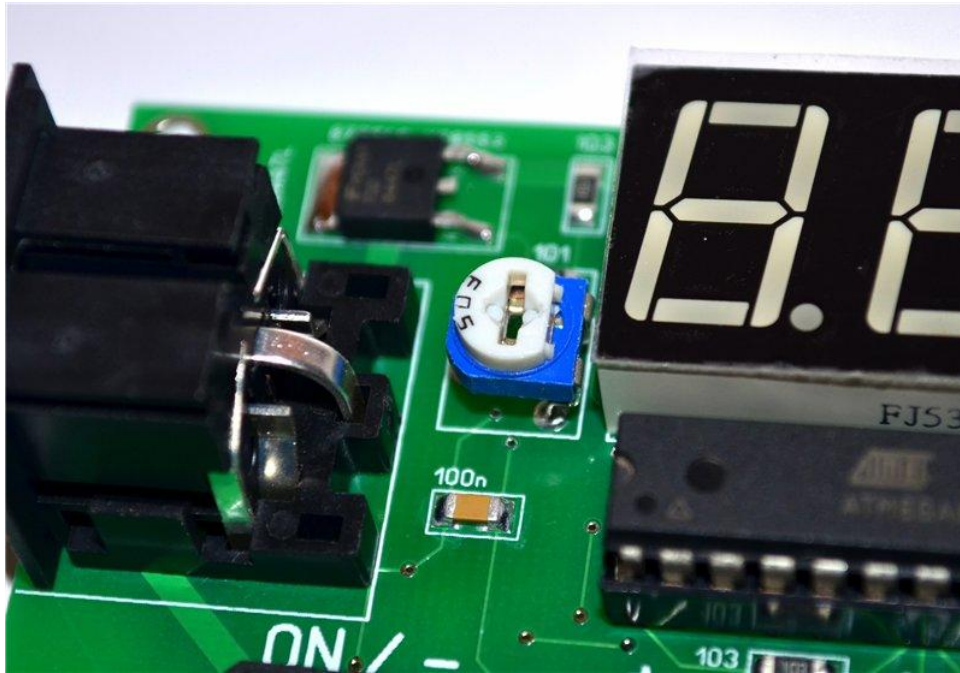

## **FEATURES:**

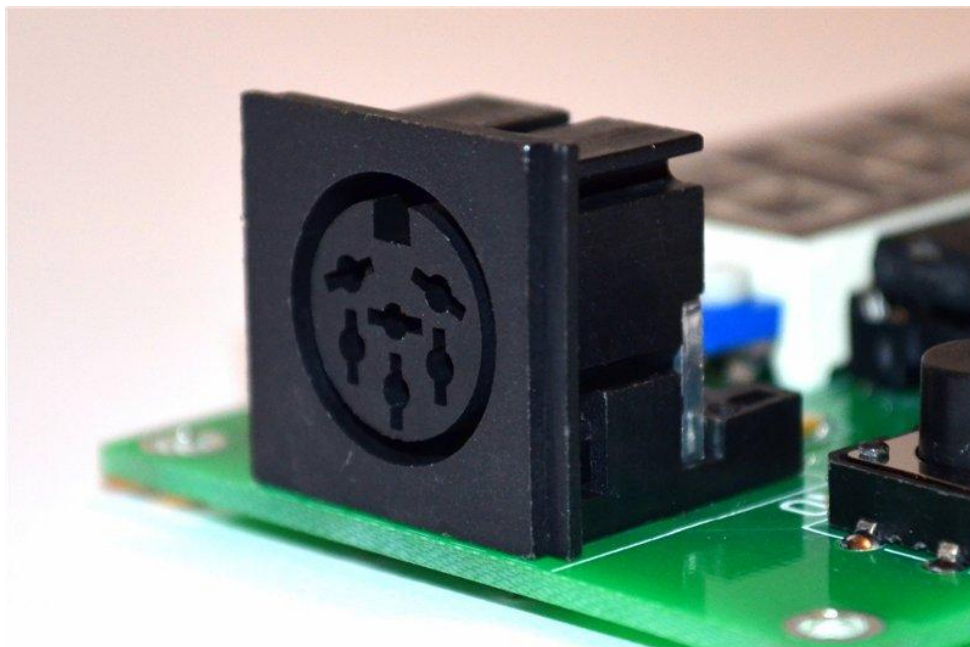

- **Controller compatible with soldering iron HAKKO 907 and others (must have PTC thermistor)**
  - **Compact size 50mm x 100mm**
  - **Mounting holes 3mm**
  - **Temperature range 200 ... 480 degree C**
- **Two buttons for decrease/increase temperature value**
- **3 memory buttons (default 200, 250, 300 degrees C), changeable by user**
- **After 60 minutes, the heater automatically turn off to save energy and protect the iron tip**
  - **Large LED display 0.56 inch (color RED)**
- **On PCB have variable resistor for calibration**
  - **DC power socket 5.5mm x 2.1mm**
  - **Input voltage DC 20-24V 3A**
  - **Soldering iron power 50W**

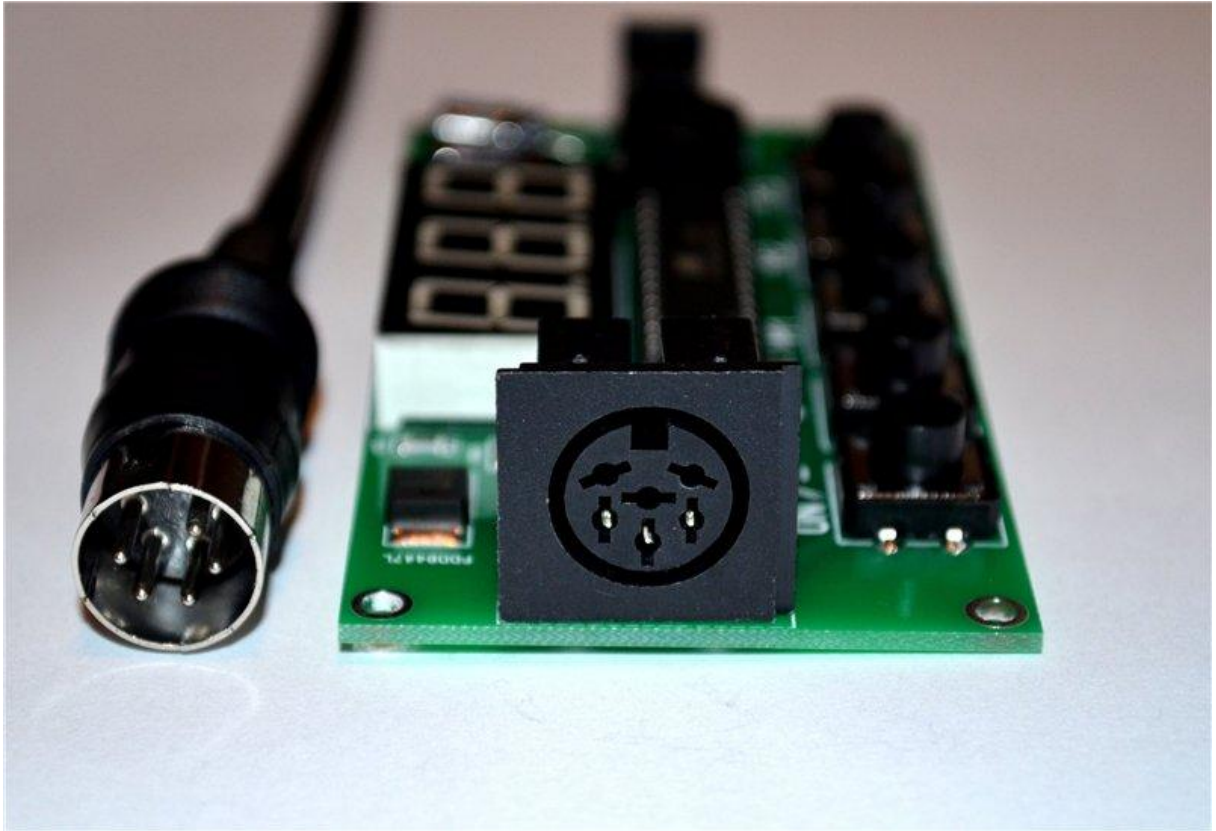

## Variable resistor for calibration on PCB

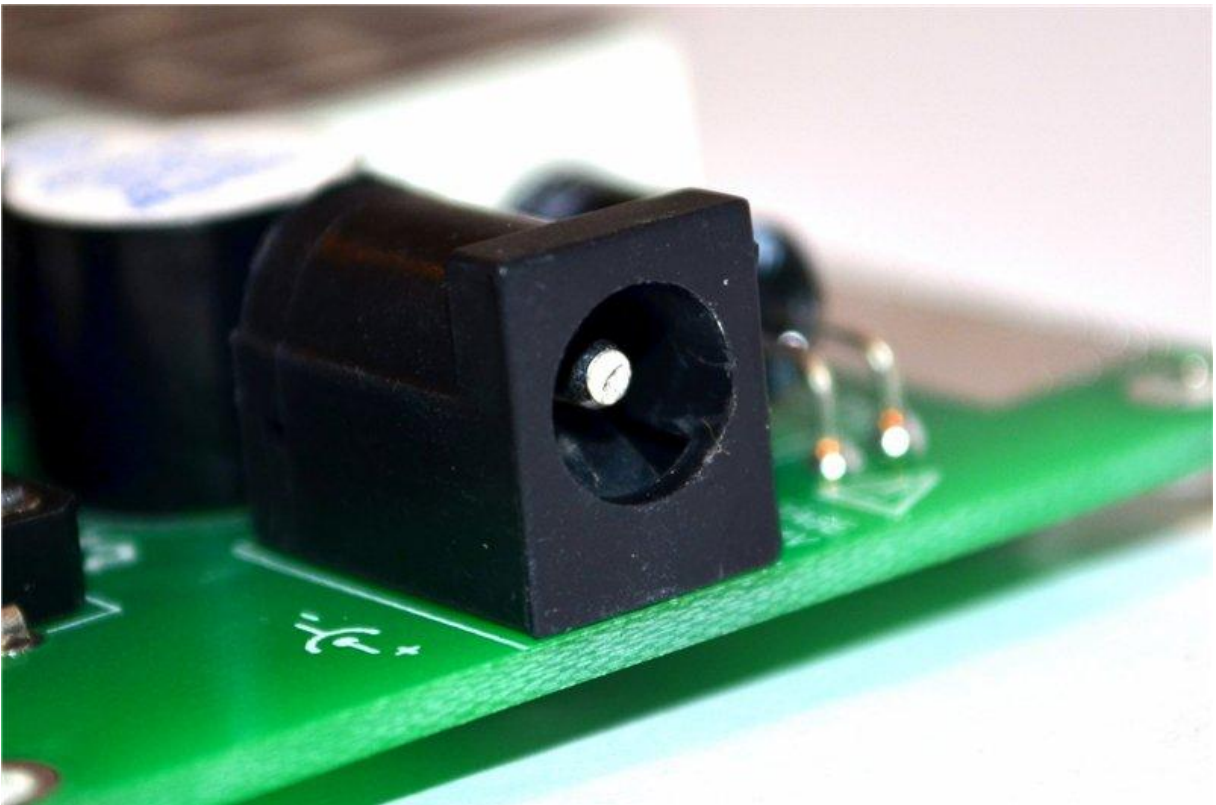

## Soldering iron socket

**Power socket**

**You can use any soldering iron with this controller.  
The main parameters of the soldering iron to be in the range as in the  
picture.  
See picture below.**
