## ESP8266

Breadboard adaptor with flash jumper and reset button

The 8266BBA01 ESP8266 Breadboard Adaptor makes it easy to connect the ESP8266 to a breadboard or standalone for programming and testing. An 8 pin 0.1 inch pitch terminal is available in the bottom to directly connect to a breadboard.

An 8 pos screw terminal is available to get access to all the ESP8266 pins without soldering. A 2x4 socket makes it really easy to switch ESP8266 modules for quick testing and programming.

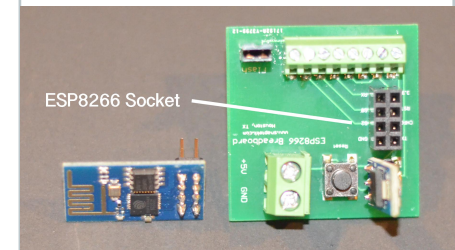

Breadboard Connector

An 8 pin 0.1 pitch terminal is available at the bottom of the board for easy and convenient plug into any standard breadboard.

The 8 pos screw terminal allows access to all ESP8266 pins

2x4 Socket

A 2x4 socket is provided for easy pug-in of the ESP8266, making it really easy to test and program many boards.
